William L. Humbert

June 27, 1974

Alan J. Goldman *signed*Destruction of Experimental Coinage

The Office of Technology desires to turn over the following coins for accounting and destruction to the Office of Internal Audit.

Nonsense Coins

<u>Number of Coins</u>	<u>Alloy</u>	<u>Gage</u>
4	95-5	.050
2	95-5	.0388
4	90-10	.050
2	90-10	.0385
4	87-13	.051
2	87-13	.0395
2	85-15	.0505
2	85-15	.0375
4	70-30	.050
3	Chromized Steel	.046

There are also an unknown number (estimate 800) of 1974 U.S. 1¢ coins struck on 70-30 brass and various U.S. and foreign coinage.

On June 24, 1974 Mark Shreeve and Bill Smith went through the Technology safe at the Philadelphia Mint and found 64 1974 1¢ coins struck on aluminum. It would be appreciated if these could be destroyed as well.

Mr. Cahoon may wish that some of the experimental strikes be retained. He indicated that an article requiring photos is being prepared by a numismatic publication and he'd like to cooperate.

All of the above coins are in the R & D vault in Philadelphia. When can the transfer be made to the audit staff?

cc: Bill Smith  
Roy Cahoon

DEC 11 1974

Mr. Nicholas G. Theodore  
Superintendent  
United States Mint  
Independence Mall  
Philadelphia, Pa. 19106

Dear Mr. Theodore:

You are authorized to destroy nine (9) tanks of 70/30 brass pennies by melting as soon as you can fit it into your casting schedule.

Careful security must be observed since these oddity coins would be quite valuable if they left the Mint.

Sincerely yours,

Frank H. MacDonald  
Acting Director of the Mint

April 28, 1975

William L. Humbert ((signed) W. L. Humbert)  
Chief, Internal Audit Staff

Revision of Striking and Destruction form dated April 9, 1975

The coin destruction form dated April 9, 1975 for one aluminum cent destroyed and shown as received from Dr. Goldman was one of the coins originally charged to Mr. MacDonald which was sent to the Office of Technology Laboratory. Accordingly, Mr. MacDonald should be relieved of the charge for the destroyed coin. This leaves three aluminum coins charged to Dr. Goldman.

FEB 5 1976

Mr. Nicholas G. Theodore  
Superintendent  
United States Mint  
Independence Mall  
Philadelphia, Pa. 19106

Dear Mr. Theodore:

Please have your engraving department prepare a 1977 dated 25¢ obverse die having the following modifications: A general lowering of the portrait relief and reduced crown.

The purpose of these modifications to the 25¢ master die for 1977 is to reduce cracking and thereby improve die life.

If this work is started at this time, we should be in a position to have trial strikes by early May, 1976. This will allow enough time for any further changes that may be required, as well as a simulated production run prior to the last quarter of 1976 when the die shop begins manufacturing 1977 working dies.

Thank you for your assistance.

Sincerely,

Alan J. Goldman

Joseph F. Nugent  
Acting Officer in Charge  
United States Assay Office  
32 Old Slip  
New York, NY 10005

Dear Mr. Nugent:

There were 10,000 special sets assembled for sale at the American Numismatic Association convention held last year in New York City. These sets were made solely for sale at this convention and surplus sets remaining after the convention were to be melted down. Due to an apparent shortage of 104 sets, upon delivery of the remaining sets to the New York Assay Office, a security investigation was conducted to determine the cause of the shortage. The security investigation has been completed and you are authorized to melt the remaining 5,448 sets.

Please arrange to have detailed accounting made regarding the items destroyed. In this regard you should also arrange for the resident auditor to perform an inventory of the sets and observe the destruction.

If there are any questions concerning the destruction of these sets, please notify this office.

Sincerely,

(Signed) F. H. MacDonald
